# ABOUT US

**True Trade Growth** was founded with a simple but powerful vision: to empower traders and investors with the tools, education, and opportunities they need to achieve real, sustainable success.

At True Trade Growth, we believe that growth isn't just about profits—it's about building confidence, knowledge, and a long-term mindset. Whether you're new to trading or a seasoned investor, we provide cutting-edge strategies, market insights, and personalized support to help you unlock your full potential.

Our team is made up of experienced traders, financial analysts, and educators who are passionate about sharing their expertise. We stay ahead of market trends, focus on risk management, and prioritize transparency in everything we do.

# MISSION AND VISION

## MISSION

At **True Trade Growth**, our mission is to empower businesses and individuals through innovative, reliable, and ethical trade solutions. We strive to foster sustainable growth by connecting markets, creating opportunities, and building lasting partnerships across global trade ecosystems.

## VISION

Our vision is to become a trusted global leader in trade and commerce, driving economic development and prosperity by delivering exceptional value, transparency, and growth-oriented strategies to our clients and communities.

# WHAT IS TRUE TRADE GROWTH

**True Growth Capital:** A Berlin-based venture capital firm run by unicorn founders and operators. They invest in early-stage entrepreneurs who prioritize solid economics and founder control over unsustainable hypergrowth

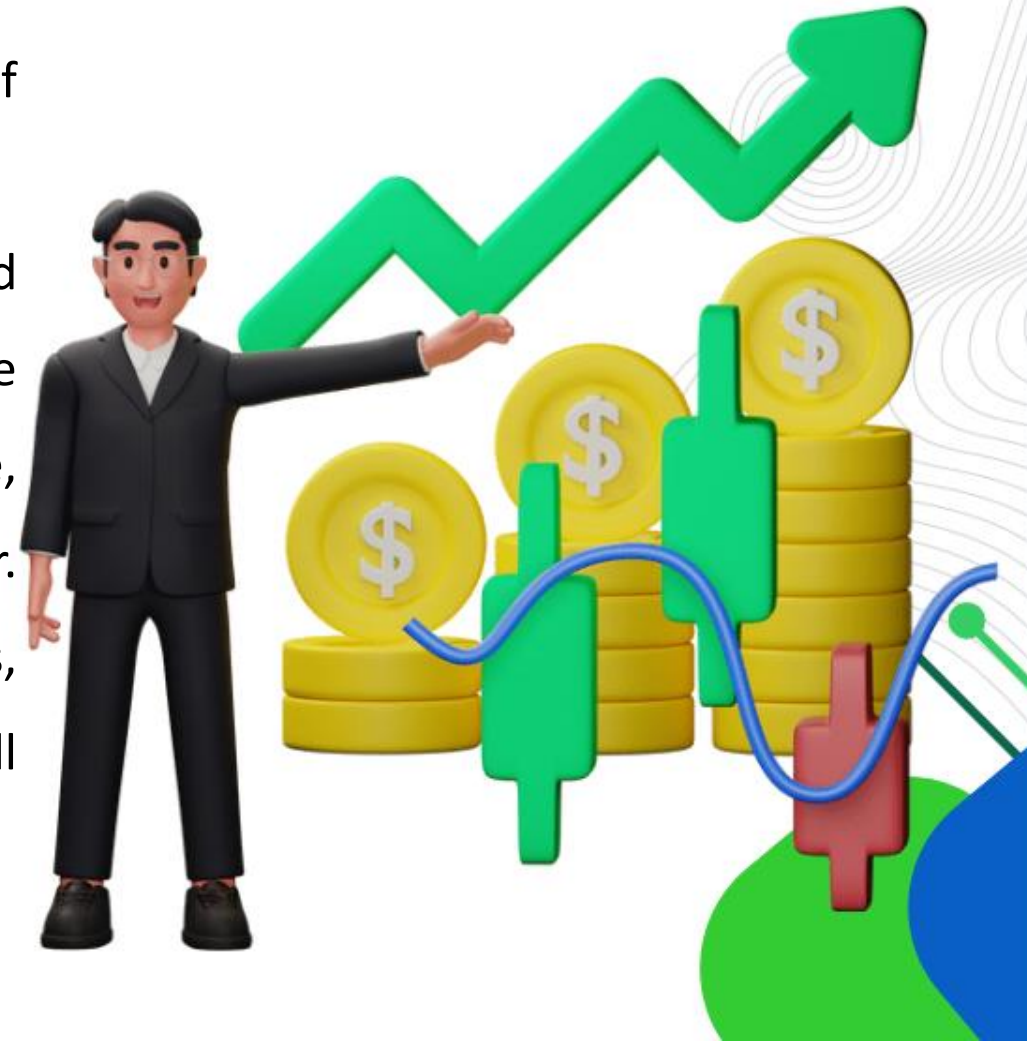

**True Trading Group:** A financial education platform offering courses on stock markets, technical analysis, and risk management systems. They aim to help traders achieve financial independence through education and trading tools.

# WHAT IS FOREX TRADING

**Forex trading** (short for "foreign exchange trading") is the process of buying and selling currencies with the goal of making a profit.

It happens in the **foreign exchange market**, which is the largest and most liquid financial market in the world — much bigger than the stock market. Every day, **trillions of dollars** are traded as people, businesses, and governments exchange one currency for another.

The price movements are affected by things like interest rates, economic news, politics, and global events. If you think the Euro will get stronger against the Dollar, you would **buy** EUR/USD.

# WHAT IS FOREX CHART

A **forex chart** is a **graph** that shows the **price movements** of a currency pair over time. It helps traders see how the price has moved in the past — and make predictions about where it might go next. On the **horizontal axis (X-axis)**, you see **time** — minutes, hours, days, or even months.

**Line Chart:** A simple line connecting closing prices over time.

# WHAT IS FOREX CHART

# WHAT IS CRYPTO TRADE

**Crypto trading** is the process of **buying and selling cryptocurrencies** like Bitcoin, Ethereum, or Solana to make a profit. It works a lot like forex or stock trading, but instead of trading currencies like dollars or euros, you're trading

- ✓ You can buy a cryptocurrency when you think its price will go up.
- ✓ You can sell (or "short") a cryptocurrency when you think its price will go down.
- ✓ Trades happen on crypto exchanges like Binance, Coinbase, or Kraken.
- ✓ Crypto markets are open 24/7 — they never close!
